Anderson Caleb

ABOUT ME

a full-stack developer with a strong passion for backend development and scalable systems. Currently pursuing a software engineering diploma at Afrihub in Abuja, I specialize in building real-world fintech infrastructure, developer tools, and intelligent systems. My experience spans across PHP, JavaScript, TypeScript, Python, C#, Node.js, React, Next.js, SQL, and Git. I enjoy solving complex backend challenges and creating software that powers businesses from the ground up. I'm the Technical Co-founder of Doowla, a modern financial infrastructure project aiming to rival Stripe and Flutterwave with features like multi-currency wallets, instant payouts, and smart APIs tailored for the African market.

Experience

Frelance Software Developer
2022 – Present

- I've been Coding since 2022 building websites and Apllications, I have enough experience in the Dev world
